DTIC FILE COPY

REPRODUCTION QUALITY NOTICE

This document is the best quality available. The copy furnished to DTIC contained pages that may have the following quality problems:

- Pages smaller or larger than normal.
- Pages with background color or light colored printing.
- Pages with small type or poor printing; and or
- Pages with continuous tone material or color photographs.

Due to various output media available these conditions may or may not cause poor legibility in the microfiche or hardcopy output you receive.

☐ If this block is checked, the copy furnished to DTIC contained pages with color printing, that when reproduced in Black and White, may change detail of the original copy.

(This document contains
blank pages that were
not filmed)

Disclaimers

The findings contained in this report are not to be construed as an official Department of the Army position unless so designated by other authorized documents.

Citation of trade names in this report does not constitute an official endorsement or approval of the use of such items.

DESTRUCTION NOTICE

For classified documents, follow the procedures in DoD 5200.1-R, Chapter IX or DoD 5220.22-M, "Industrial Security Manual," paragraph 19. For unclassified documents, destroy by any method which precludes reconstruction of the document.

PREFACE

This bibliography is a list of technical publications and papers by personnel of the US Army Natick Research and Development Center and its contractors for the period October 1983 through September 1984. The arrangement is by organizational elements. Patents issued to personnel in FY84 are also included.

Reprints of journal articles, in some cases, are available from the individual authors. Copies of technical reports may be obtained from (1) Defense Technical Information Center, Cameron Station, Alexandria, Virginia 22314, or (2) the National Technical Information Service, Springfield, Virginia 22161. The "AD" number should be cited when ordering copies of reports.

LIST OF PATENT ISSUANCES

Date	Name	Lab/Ofc	Title of Patent
Jan 12 84	Daniel Berkowitz	FEL	Method of Producing Thermally Processed Egg Products
	Alan B. Bennett	FEL	
	John L. Secrist	FEL	
	Debra A. Milette	FEL	
Feb 21 84	Douglas Swain	IPL	Footwear Apparatus and Method
	Richard Lacerte	IPL	
Jun 12 84	Philip Durand	IPL	Protective Helmet
	Lawrence McManus	IPL	
Sep 18 84	Benedict J. Gallo	SATL	Hyperproducing Cellulase Microorganism

This document reports research undertaken at the US Army Natick Research and Development Center and has been assigned No. NATICK/TR-85/001 in the series of reports approved for publication.
